

Client Name _____ Patient Name _____

Due to the risk of your pet licking its incision we recommend an Elizabethan collar be applied to all post-surgical patients. Licking the incision will cause sutures to dissolve too quickly and infection to occur. This will slow the healing process for your pet. If licking occurs your pet may need to come in for wound therapy, staples, and oral antibiotics.

_____ Decline Elizabethan Collar

_____ Apply Elizabethan Collar - **Price \$20.00.**
